

WHERE ARE THEY AND WHAT ARE THEY UP TO?

A few of our past students have contacted us to let us know what they are up to. Here are just a couple of the students we are in contact with.

"I'm working for my dad at the moment to get experience, until I find another job. I'm busy doing construction drawings and bits of design here and there for a house in Lundudno and Berlin. I am meeting a lot of people in industry which is really great, because I'm slowly but surely getting my foot in the door. I may go to Mexico (Lolita Bay) towards September for a few months as I know someone who has a design and architectural firm there and he offered me a temporary position to help him design a beach resort. I still have a while to decide.

But otherwise I am well, getting experience, gaining mountains of knowledge and have realised I am far more prepared for industry than I ever gave myself credit for:) Thank-you:)" Shannon

"I have been working with an events company for the last bit but am starting freelance styling full time from next week. Hope to work with magazines and on advertising shoots.

I will mostly be assisting as that is how you start out but there are a few things coming up that I am doing on my own for clients like the events company who I am keeping as a client." Nadia Marais

Another one of our past students, and currently a lecturer at Inscape, is making her screen debut as a presenter on Kyknet. Alti Fouche studied Interior Design and received her degree in 2009. What follows is a feature on her as it appears on the Kyknet website.

Alti Fouche is gebore in Pretoria, getoë in Delmas en sy het matrikuleer in Randburg. Biologie, tale en kuns was van haar gunsteling vakke. Gedurende hierdie tyd het sy by RSG begin vryskut as mede-aanbieder van die dikwels omstrede maandagaand jeugprogram Tempo.

In 2009 voltooi sy haar BA in Binnenshuise Argitektuur by die Inscape Design College. Sy het haar in-diens opleiding gedoen in televisie-stelontwerp by Teleset. Wanneer sy nie in die bos is nie, doseer sy tans Argitektoniese Tekeninge by Inscape, en ontwerp vir kliente in verskeie dissiplines.

Die Projek Aardwolf-logo en handelsmerkidentiteit is deur haar ontwerp.

Projek Aardwolf is Alti se debuut as televisie-aanbieder. Alti se ander groot liefdes is duik, musiek en skryf.

AUTOCAD TRAINING CENTRE IN PRETORIA

The new computer room at the Pretoria campus is now an Autodesk ATC (Authorised Training Centre) and Autodesk Exam Centre. We are authorised to offer software training in Revit, AutoCAD and StudioMax as well as proficiency exams for all the software. Architectural Draughting students, Interior Decorating students as well as anyone wanting to learn any of the afore

mentioned software programmes will be able to do so at the Pretoria campus by completing the registration form available on our website. Please consult the registration form for available dates and times.
